Job Description
The department of Electronics and Informatics (ETRO) of the Vrije Universiteit Brussel is looking for an experienced C++ software developer for working on state of the art biomechanical modelling methods in close collaboration with researchers within the department and beyond. We are looking for a software developer with clear interest in biomedical applications and signal processing.

Main duties
- You become the main programmer of an existing state of the art biomechanical modelling toolbox
- Translation of algorithms prototyped in Matlab into C++
- Software architecture, design and development of C++ applications
- Participation on process improvements and technology decisions
- Problem fixing, debugging, writing unit tests, code reviews
- Maintaining documentation
- You take a coordinating role in the software development process

Environment
You will work within a small research team (currently 14), composed of professors, post-doc researchers, PhD students and software developers. Given the highly interdisciplinary nature of the different research projects, we look for enthusiastic team players that have a clear interest in scientific research and in biomedical applications. Our team is currently a fruitful mixture of people from different nationalities. Consequently, the working language is English.
The accepted candidate should be available on the short term and will have an initial contract until the end of 2018.

Candidate Requirements
- Master degree in Computer Science, Information Technologies, Electro technical engineering ...
- Advanced C++ programming on multiple platforms
- Fluency in object oriented programming
- Advanced knowledge of English
- Several years of experience as a software developer
- We are looking for a highly-motivated person, eager to learn, who is not afraid of taking responsibility, while being a team player as well.
- Good knowledge of other programming languages (e.g. Python, Matlab, Javascript) is appreciated.
- Previous experience in (bio)medical software development is highly appreciated.
- Hands on experience in working with 3D models is appreciated.

CONTACT PERSON
Do not hesitate to contact Bart Jansen for further questions on this vacancy.

Prof. Dr. Bart Jansen (bjansen@etrovub.be), Department Electronics and Informatics (ETRO), Vrije Universiteit Brussel, Pleinlaan 2, 1050 Brussel.
